First, perform the same steps that you did for Chrome and Safari Afterwards, follow these additional steps to get started.. You can find these drivers on the Reader's Manufacturer Website Step 3: Update Your DOD CertificatesNow that you have your CAC reader connected and accepted on your Mac computer, it's time to ensure you have the right certificates in order to access DOD CAC required web pages.. There are only a couple that you can choose from and I've listed them below If you already have a CAC reader and it isn't Mac friendly, you could update the firmware, however, for the non-tech savvy people out there, it's probably better to just purchase a new one and save the headache – they're only ~\$11-13 dollars.
